

RAF SE5a Bauanleitung

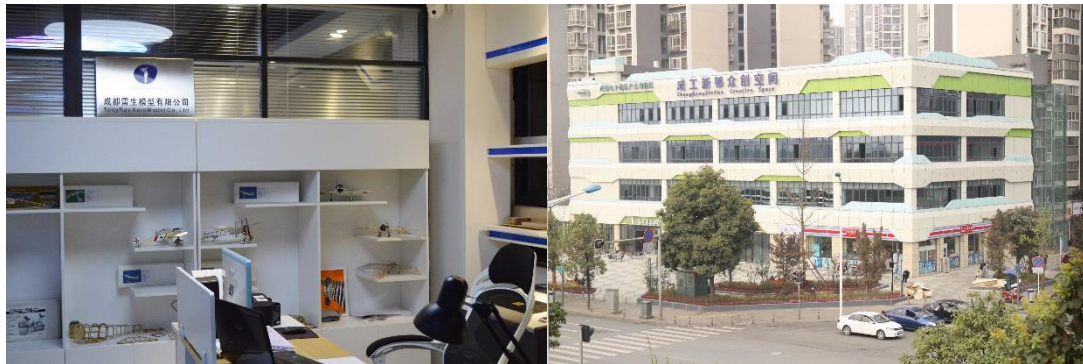

Hallo, wir sind Tony Ray & Sebastian Hansen. Zusammen sind nun seit einiger Zeit in der Modellbau-Szene unterwegs.

Von Eindecker bis Doppeldecker, von großen Modellfliegern bis kleinen Slow Flyern.

In unserer Modellbauwerkstatt verbringen wir gut und gerne eine ganze Nacht am entwerfen neuer Pläne.

Seit Anfang 2019 verkaufen wir nun unsere ersten eigenen Baukästen in Europa.

Allzeit guten Flug!

Holm und Rippenbruch,

Ihr Tony & Sebastian

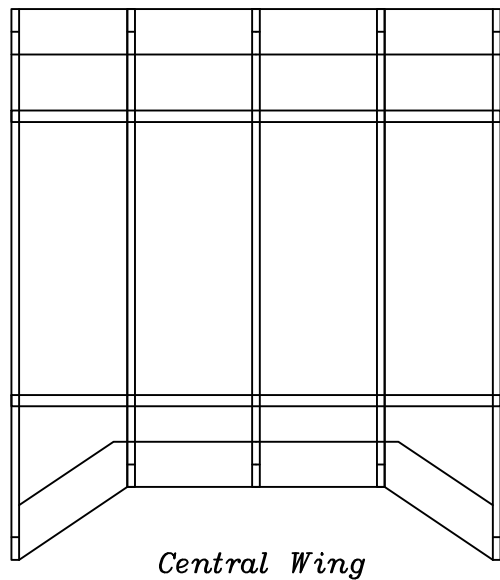

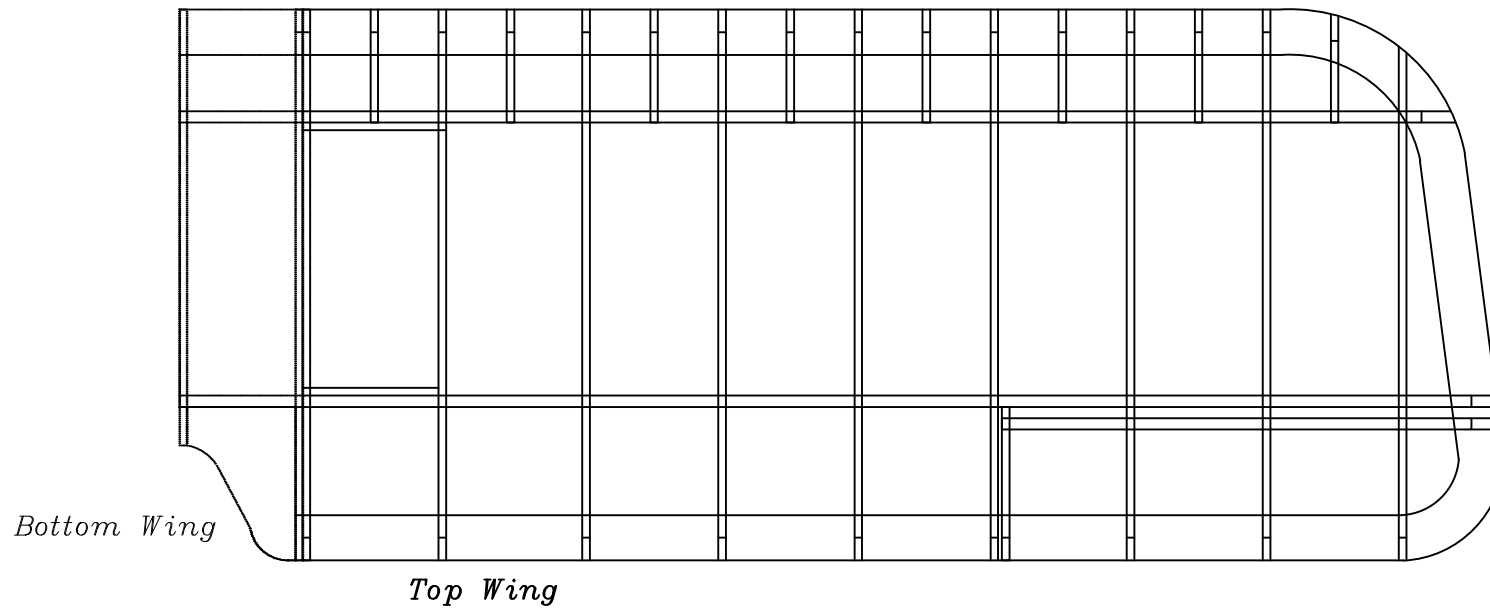

Hier haben Sie ein paar Eindrücke von unserer Arbeit!

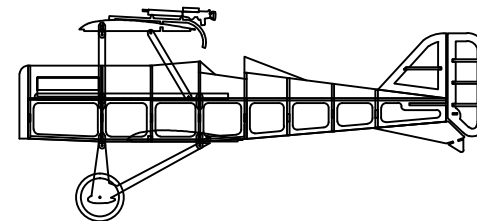

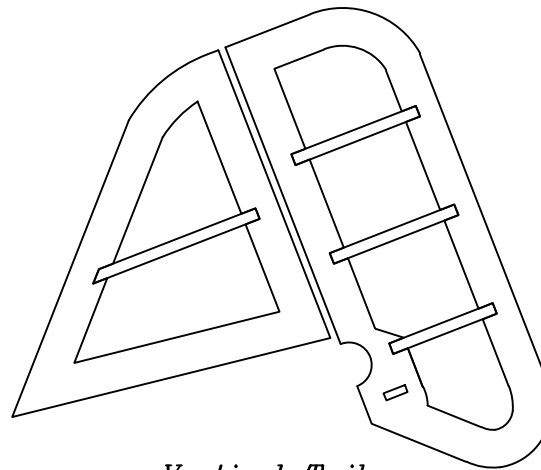

Jeder startet einmal klein. So verkaufen wir seit einiger Zeit unsere verschiedenen Modelle erfolgreich in Europa.

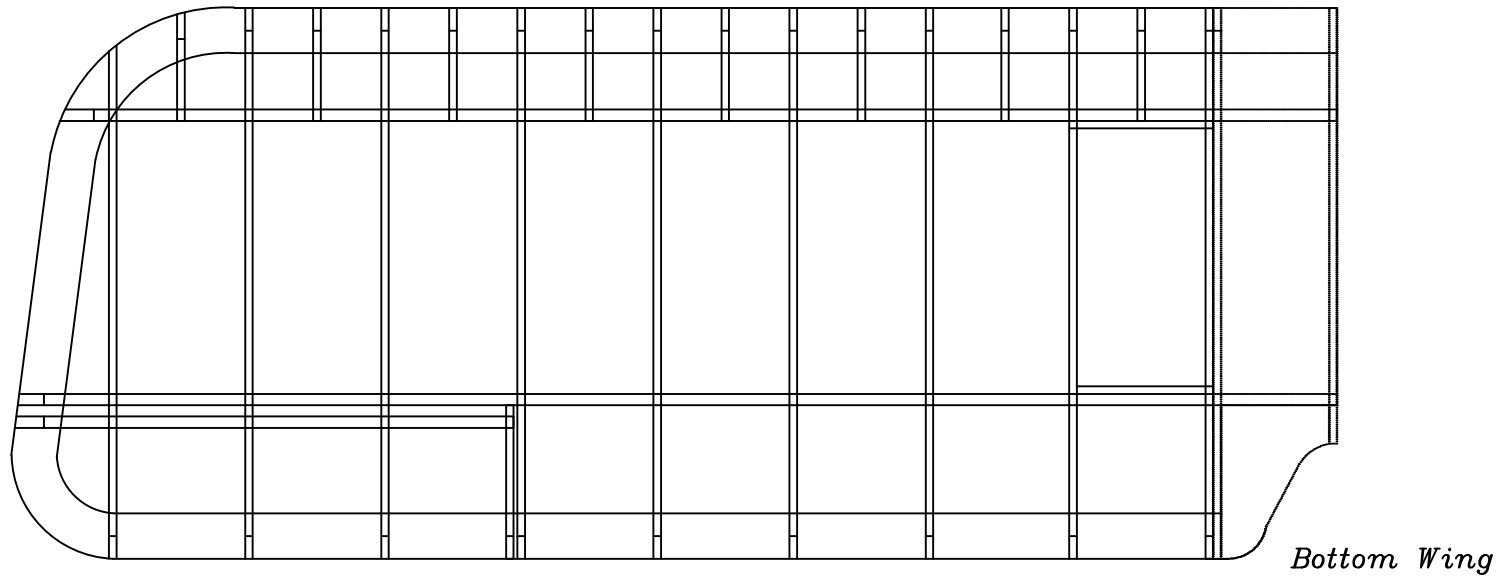

Wenn Tony einmal anfängt über Baupläne und seine Flieger zu reden, ist er gar nicht mehr zu stoppen!

Teil 4: Elektronik

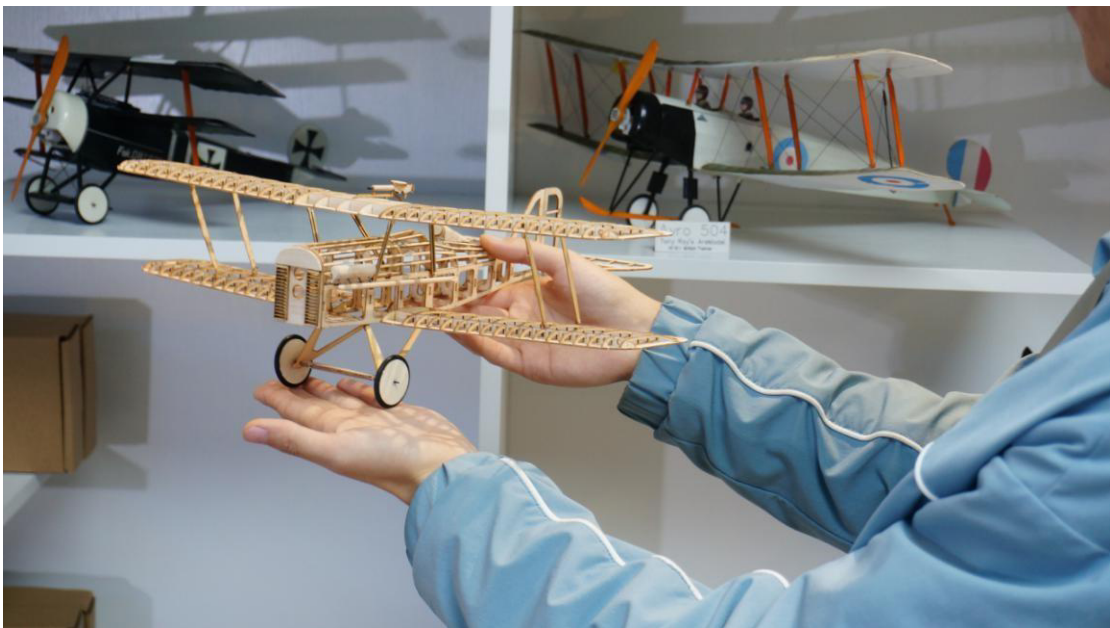

This plane designed for both 3ch and 4ch flying. If you prefer to 4ch flying, please add a 1.7g liner servo for the aileron.

(Same way with the Fokker dr.1)

Geschafft!

Herzlichen Glückwunsch, Sie haben Ihre RAF SE5A fertig gebaut.

Nun müssen Sie die elektronischen Kleinteile richtig zusammensetzen und Ihr Modellflugzeug mit Bespann-Folie eindecken.

Sie haben noch nie Bespannfolie verwendet?

Hier haben wir Ihnen eine hilfreiche **Anleitung** verlinkt:

<http://www.ffscale.co.uk/comp8.htm>

Sie können gar nicht genug von Slow Flyern kriegen?

Uns geht es genauso!

Für Ihre Sammlung haben wir **viele weitere Modelle** im Angebot.

Wie wäre es zum Beispiel mit dem erfolgreichsten britischen **Doppeldecker?**

Die Sopwith Camel.

Wir schicken Ihnen Ihre Modelle wie gewohnt schnell und sicher verpackt zu.

Weitere viele schöne Modelle warten auf Sie!
